Practical – 11

Roll No. : S037	Name: Himanshu Manoharlal Shrivastav
Class : SYIT	Date/Time of Submission: 04-08-2026

11. Calculate mean, median and mode of a list of numbers. Implement basic statistical calculation using scala collections

Code:

```
import breeze.linalg._
import breeze.stats._
import breeze.nummerics._ // 1. Fixed typo: 'numnerics' instead of 'numeric'

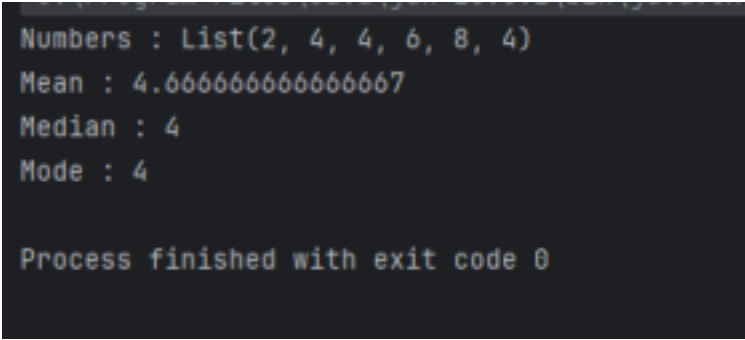

object Practen extends App {
  val numbers = List(2,4,4,6,8,4)
  val m = numbers.sorted
  val median = s(s.length / 2)

  val d = numbers.distinct
  var mode = d(0)
  var maxCount=0

  for(x<-d) {
    val count = numbers.count(_==x)
    if(count > maxCount){
      maxCount = count
      mode = x
    }
  }
}
```

```
    }  
}  
  
println("Numbers : " + numbers)  
println("Mean : " + m)  
println("Median : " + median)  
println("Mode : " + mode)  
  
}
```

Output:

```
Numbers : List(2, 4, 4, 6, 8, 4)  
Mean : 4.666666666666667  
Median : 4  
Mode : 4  
  
Process finished with exit code 0
```
