Python Programming Practical

Practical – 12

Roll No. : S037	Name: Himanshu Manoharlal Shrivastav
Class : SYIT	Date/Time of Submission: 04-08-2026

12 . Write a program to compute frequency distribution and cumulative frequency of a dataset.

Code:

```
import breeze.linalg._
import breeze.stats._
import breeze.numetrics._ // 1. Fixed typo: 'numetrics' instead of 'numeric'

object Practen extends App {
  val data = List(3, 5, 3, 2, 5, 4, 3, 4, 5)

  // Count frequency of each value
  val freq = data.distinct.map(x => (x, data.count(_ == x)))

  // Sort by value
  val sor = freq.toSeq.sortBy(_._1)

  // Print frequency and cumulative frequency
  var cum = 0

  println("Value\tFreq\tCumulative")
  for ((value, count) <- sor) {
```

```
        cum += count

        println(s"$value\t\t$count\t\t$cum")
    }

}
```

Output:

Value	Freq	Cumulative
2	1	1
3	3	4
4	2	6
5	3	9
